Atlas Health Analytics Pvt. Ltd.

FY2025 Board Performance Pack

Field	Value
Tenant	Atlas Investments
Portfolio company	Atlas Health Analytics Pvt. Ltd.
Department	Finance
Visibility	Finance only
Reporting period	FY2025 with FY2024 comparison
Currency	INR crore
Document ID	ATLAS-FIN-PDF-2025-001
Status	Approved synthetic source

Executive conclusion: revenue increased by 20.0%, and EBITDA margin improved from 15.0% to 17.0%. The primary causes were enterprise customer mix and cloud-infrastructure optimization.

Fictional synthetic information for access-control and retrieval testing only.

1. FY2025 Financial Performance

Metric	FY2024	FY2025	Change
Revenue	90.00	108.00	+20.0%
Cost of Goods Sold	54.00	61.56	+14.0%
Gross Profit	36.00	46.44	+29.0%
Operating Expenses (excl. D&A;)	22.50	28.08	+24.8%
EBITDA	13.50	18.36	+36.0%
EBITDA Margin	15.0%	17.0%	+2.0 pp
Net Profit	6.38	9.42	+47.8%
Closing Cash	20.00	28.00	+40.0%
Bank Debt	24.00	20.00	-16.7%

Calculation ground truth: FY2024 EBITDA margin = 13.50 / 90.00 = 15.0%. FY2025 EBITDA margin = 18.36 / 108.00 = 17.0%.

The companion workbook is the authoritative structured metric source.

2. Drivers of Margin Expansion

2.1 Enterprise customer mix

Enterprise contracts represented 62% of FY2025 revenue compared with 48% in FY2024. Enterprise deployments carried higher average subscription revenue and lower support cost per account.

2.2 Cloud-infrastructure optimization

Reserved compute commitments, storage-tiering changes, and model-serving optimization reduced cloud cost per analyzed study by approximately 21%.

2.3 Implementation efficiency

Reusable integration templates reduced average enterprise onboarding time from 11 weeks to 8 weeks. The benefit was partly offset by additional compliance and security hiring.

Supported answer for retrieval evaluation: Atlas margin improved because higher-margin enterprise revenue grew and cloud cost per study declined.

3. Liquidity, Risks, and Outlook

Liquidity

Closing cash increased to INR 28.0 crore and bank debt declined to INR 20.0 crore. Under the synthetic stress assumption of INR 1.6 crore monthly burn, cash runway is 17.5 months.

Key risks

Risk	Likelihood	Impact	Mitigation
Enterprise concentration	Medium	High	Customer diversification targets
Healthcare compliance change	Medium	High	Legal monitoring and control reviews
Cloud pricing changes	Low-Medium	Medium	Multi-region cost benchmarks
Implementation capacity	Medium	Medium	Partner enablement and templates

Insufficient-evidence test: this pack contains no audited FY2026 revenue, no public share price, and no patient-level medical data.
